

IMPERIAL LOWERING DEVICE

The side rails on The Funeral Director's Model come apart in the center permitting them to be folded over the end rail and carried in two small bags. The side rails on The Cemetery Model will not come apart in the center. "3 in 1" includes device, placer rollers, stand and drape. Both the Funeral Director and Cemetery Models open to 94" long by 38" wide and collapse to 62" by 25".

FRIGID LOWERING DEVICE STAND

For use with any lowering device. It will enhance your service by raising the device and making it easier for the pallbearers to place the casket at a comfortable height.

Stock No.	Description
1007	Telescoping Stand and Drape Set
1011	Regular Stand and Drape Set

STREAMLINER CASKET CARRIAGE

Your lowering device is always set up and ready for use! After the service, the Streamliner is simply towed away. This eliminates damage to your lowering device and reduces possibility of back injuries.

The Streamliner is rugged, heavy steel tubing construction. It has four wheel brakes and individual wheel locks. Each Streamliner comes equipped with a removable tow tongue.

Stock No.	Description
